## DATA SHEET

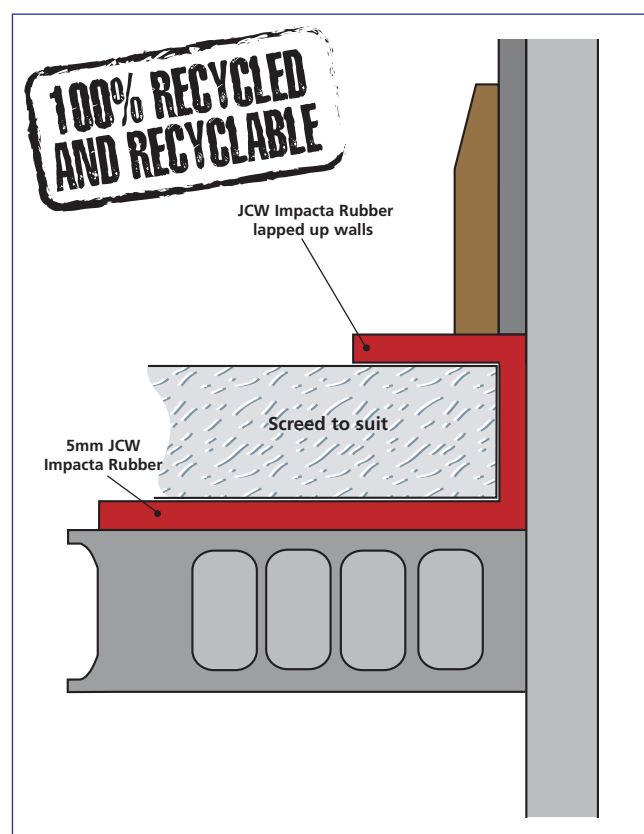

# JCW IMPACTA RUBBER

## THE PRODUCT

JCW's Impacta Rubber is as adaptable as it is resilient. It is designed for real building sites where material gets moved, knocked and rained on: Impacta Rubber can handle all this and still perform. It is designed to go under screeded floors, meaning it won't be damaged if flooring is taken up at a later date. Impacta Rubber complies with Part E of the Building Regulations and meets relevant Robust Detail standards, although it is not yet RD certified. This product is not only extremely effective, it is also extremely cost-effective.

## THE FACTS

- Robust resilient underscreed layer system that complies with RD performance targets.
- Puncture proof material.
- Suitable for pre-cast and solid concrete floors (minimum weight 335kg/m<sup>3</sup>).
- Minimal change to traditional floor and ceiling construction.
- Accepted by NHBC for ADE compliance.

## SPECIFICATION

	Airbourne Dn tw+Ctr	Impact Ln tw
Approved Document. E. Test Requirements	Min. 45dB	Max. 62dB
Mean Independent Site Test Results	49dB	52dB
