CEDRAL
Timelessly beautiful facades

The DNA of Cedral

The ideal low maintenance, rot free alternative to traditional timber weatherboard.

Fibre cement offers both contemporary and flexible design options, and is used by many architects and homeowners to create stunning facades. The simple combination of wood cellulose, sand, synthetic fibres, water and cement make fibre cement one of the most environmentally friendly and comprehensive building products available.

Hard as stone easy as wood.

The material's multi-layered fibre structure supports the cement and other elements, which gives it impressive strength, and means that it can be far thinner than concrete.

CEDRAL BOARD

Cedral Board is an impact resistant, durable and flat board, ideal for soffits and fascias.

Cedral Board is available in 9 colours and in the following sizes:

- 2500mm x 200mm
- 2500mm x 300mm
- 2500mm x 400mm

Ⓒ Cedral Click and Cedral Click Smooth standard factory-applied colour range.

* Not available for Cedral Click or Cedral Click Smooth.

** Cedral Click and Cedral Click Smooth may be subject to minimum order quantities and extended lead times.

† Cedral Board is available in these colours.

‡ Cedral Lap in Light Oak and Dark Oak is designed to mimic the appearance of stained natural wood and, as such, a variation in the colour and shade is part of the effect inherent in the material design.

Complete system solution

ALUMINIUM PROFILES

A full range of aluminium profiles is available in complementary colours, for both Cedral Lap and Click, which provides a complete cladding solution. Please refer to the Cedral Fixing Guide for more information on the aluminium profiles. To order a copy of the Cedral Fixing Guide, visit www.cedral.co.uk.

Profile (sizes in mm)	Cedral Lap	Cedral Click
External corner (symmetric) This universal trim can be used to provide protection on external corners and for stop profile applications.		
External corner/window reveal (asymmetric) Can be used as an external corner or where detailing on a window reveal.		Not required
Internal corner To finish the corner where Cedral meets on an internal corner forming a seal between the trim and the corner.		
External corner junction Used as a corner joining piece. Only available in black. 300mm length.		Not required
Start profile Used to start a cladding run with a lip to cover the first batten.		
Vertical start profile Used to start a vertical cladding run.	Not required	
End profile Hides any sharp corners and protects the Cedral edges from wear and tear.		Not required
Connection profile End trim to finish Cedral when used as a single piece on a window reveal or soffit.		
Perforated closure Used to protect against pest infestation and debris. Galvanised finish 2.5m length.		
Window lintel profile Used to finish above the window and to support next course of Cedral Click.	Not required	

ACCESSORIES

- Cedral Click Clips are required when installing Cedral Click. These are supplied complete with stainless steel screws.
- Cedral touch up paint and colour matched screws are available. For the full accessories range, please refer to the Cedral Fixing Guide

Cedral suits every style

Cedral is ideal as an over-clad solution for existing properties, or as part of a new build facade. Available in a wide selection of factory applied colours, enabling homeowners and architects to create striking, individual homes, which are low maintenance.

Easy to install

Cedral needs to be fixed to timber battens of at least 50mm wide and spaced at a maximum of 600mm. Cedral should be fixed to at least three battens and must have a minimum 30mm clear cavity behind it.

Smart accessories

Cedral has a range of complementary profiles and accessories, making it easy to work around details. All profiles are quick to install and make sure your facade is nicely finished.
