

HUSH MULTI PANEL

Hush Multi Panel is an innovative acoustic multi purpose board that contains high levels of mass to ensure optimum acoustic performance.

Hush Multi panel has been designed to ensure ceiling and wall linings can perform to the high acoustic levels required in modern day construction.

Hush Multi Panel has been used as part of a decoupled ceiling system on resilient bars or suspended ceilings. It has also been used to great effect in reducing flanking transmission as part of a wall lining system.

ACOUSTIC PERFORMANCE

Impact $L'_{nT,w}$ dB	Airborne $D_{nT,w}$ dB	Airborne $D_{nT,w} + C_{tr}$ dB
59	62	55

Results based on Hush Multi Panel installed on Hush MF Ceiling System

PRODUCT DATA

- Size = 1180 x 580mm (nominal)
- Thickness = 13mm
- Weight = 19 kg/m²

SUITABLE FOR:

FEATURES

- ✓ A multi-purpose board to create acoustic wall and ceiling linings
- ✓ Can be used as part of a wall lining system to reduce flanking noise transmission
- ✓ Meets Building Regulations standards for Document E (England & Wales), Section 5 (Scotland) and Part G (Northern Ireland)
- ✓ Minimal thickness
- ✓ Can be used as part of a Code For Sustainable Homes Specification
- ✓ Can be used as a Robust Detail ceiling or wall board
- ✓ Extremely durable
- ✓ Excellent acoustic performance
- ✓ High mass board to reduce sound transfer
- ✓ Can achieve an hour's fire rated when over boarded with 15mm Fire rated plasterboard.
