IndiBoard®

IndiBoard® is a semi-rigid, multi-purpose thermal insulation board made from industrial hemp.

Breathable and vapour-open, it safely transports excess moisture outwards, helping to keep surrounding materials dry and preserve buildings.

Suitable for use as an internal insulation board, IndiBoard® can be applied in both retrofit projects and new-builds, whether in timber frame or solid masonry.

Storage and handling

Product must be kept dry during storage and delivery.

Installation

Refer to installation guide for recommendations. Best cut with IndiNature insulation saws or powered dual-blade reciprocating saws. Further details on request.

Environmental impacts

IndiBoard® has a net storage of carbon. This is a circular product that can be reused at end of life, shredded and made into more of the same product.

Available formats*

Dimensions (mm)	Thicknesses (mm)
600 x 1200	20, 40, 60, 80, 100, 120, 140

***Other sizes may be available on request.**

Technical data

Thermal conductivity λ	0.039 W/m.K
Bulk density ρ	130 kg/m^3
Specific heat capacity C	2202 J/(kgK)
Vapour diffusion resistance μ	≤2
Compression strength	65 kPA
Reaction to fire	E
