

Product Data Sheet

Application: Separating Walls

Isover RD Party Wall Roll

Acoustic Insulation for masonry cavity separating walls

Isover RD Party Wall Roll is a glass mineral wool roll that can be used to reduce the passage of sound across a masonry cavity separating (party) wall and minimise air movement within the cavity, improving its thermal performance.

When used as part of Robust Detail separating wall constructions E-WM-17, E-WM-20 and E-WM-24, it removes the need for costly pre-completion sound testing and can achieve +5dB over acoustic performance requirements set out in Building Regulations Approved Document E (England and Wales). Rolls are ready-cut to 2 x 455mm to fit between standard wall tie spacing.

Features and Benefits

Can achieve a zero U-value for party walls, as defined in Building Regulations (Approved Document L1A, Table 3), when fully filling the party wall cavity and in combination with mineral wool filled cavity barriers at the edges of the cavity.

When used as part of a Robust Detail construction, it removes the need for costly pre-completion sound testing, making it a more cost effective solution to implement.

Achieves a Euroclass A1 Reaction to Fire classification, according to EN 13501-1.

Isover RD Party Wall Roll contains recycled glass. A combination of 52% externally sourced recycled glass and 30% internally sourced glass cullet.

Helps reduce unwanted noise between attached properties when used as part of a Robust Detail construction.

All electric equipment in the plant powered by 100% renewable electricity.

Key Considerations

When using Isover RD Party Wall Roll, you need to satisfy yourself that use of the product meets all relevant national Building Regulations and guidance as well as local, national and other applicable standards relevant for your construction or application, including requirements in relation to fire and applicable height restrictions.

Please refer to isover.co.uk for all current documentation relating to this product.

Product Specification

Product code	Thickness (mm)	Length (m)	Width (m)	Roll area (m ²)	Rolls per pallet	Pallet area (m ²)	λD Declared thermal conductivity (W/m.K)	RD Declared thermal resistance (m ² .K/W)
5200625584	75	8.50	2 x 0.455	7.74	28	216.58	0.036	2.05
5200625585	100	6.00	2 x 0.455	5.46	28	152.88	0.036	2.75

Characteristics

Thermal

Declared thermal conductivity of 0.036 W/m.K under EN 13162: Thermal insulation products for buildings. Factory made mineral wool (MW) products.

Environmental

All Isover products are manufactured under Environmental Management System - ISO 14001.

Certification

UKCA Marked to BS EN 13162.
CE marked to EN 13162.
Designation code: MW-EN 13162-T3.

Handling, Storage, Health and Safety

Information regarding storage, installation and handling of Isover products and health and safety information can be found at isover.co.uk/suis.

Quality

All Isover products are manufactured under Quality Management Standard - ISO 9001.

EUCEB

EUCEB certified demonstrating our mineral wool fibre products conform with Note Q of Regulation (EC) No 1272/2008.

Indoor Air Quality

Achieves a Eurofins Gold product status for indoor air quality.
