

CERESIT CLEANER

Cleaning agent for fresh PU foam

Packaging: 500/650 ml

CERESIT CLEANER is used for removing fresh foam spots and cleaning the applicator.

STABILITY

Application temperature of this product is min + 5 °C. Do not store above + 50 °C. For longest shelf life avoid storage above + 25 °C and not below – 5 °C (for a short time – 20°C). Best before: 36 months after the production date.

APPLICATION

Cleaning of the applicator is necessary if:

- Difficulties have been experienced while using a gun
- Gun has not been used for more than 1 month
- After removing the can from the gun without replacing it with a new can

Additionally, it is highly recommended to clean the gun regularly after 2 – 3 months of using time. This will guarantee long life and functioning without problems for the gun.

Screw the can tightly onto the gun. Spray through the gun. CERESIT CLEANER can not be used to clean cured foam! The cleaner can damage the lacquered or painted surfaces, textiles and plastics! Avoid spraying on spotless surfaces. **Powerful solvent!**

SAFETY

Can is under pressure. Do not expose to temperatures higher than + 50°C. Do not point in the direction of a flame or any heating place. Ensure good ventilation when working! Contains extremely flammable compounds. Without adequate ventilation formations of explosive mixtures may be possible. **DO NOT SPRAY NEAR HEAT OR FLAME! KEEP OUT OF REACH OF CHILDREN!**
